

Economics = oikos (household) nomos (rules or norms)  
= household management

*It is time to rethink the ever rising line of growth.*

*A growing economy does not  
necessarily mean a thriving economy.*

*We all need economies that make us all thrive,  
whether or not they grow.*

If you keep on going for growth where does GDP finally go?

If the world economy grows at per year 3% to 2050, it will double in size by 2037 and almost treble it by 2050 bringing a surge of demand for more construction materials and consumer products.

All this against the finite resources of the planet!

You've got to land at sometime!

*Humanity's 21<sup>st</sup> Century challenge is clear: To meet the needs of all people within the means of this extraordinary, unique, living planet so that we and the rest of nature can thrive.*

Kate Raworth

*There is no economy without ecology*

Satish Kumar

We need a  
Circular Economy

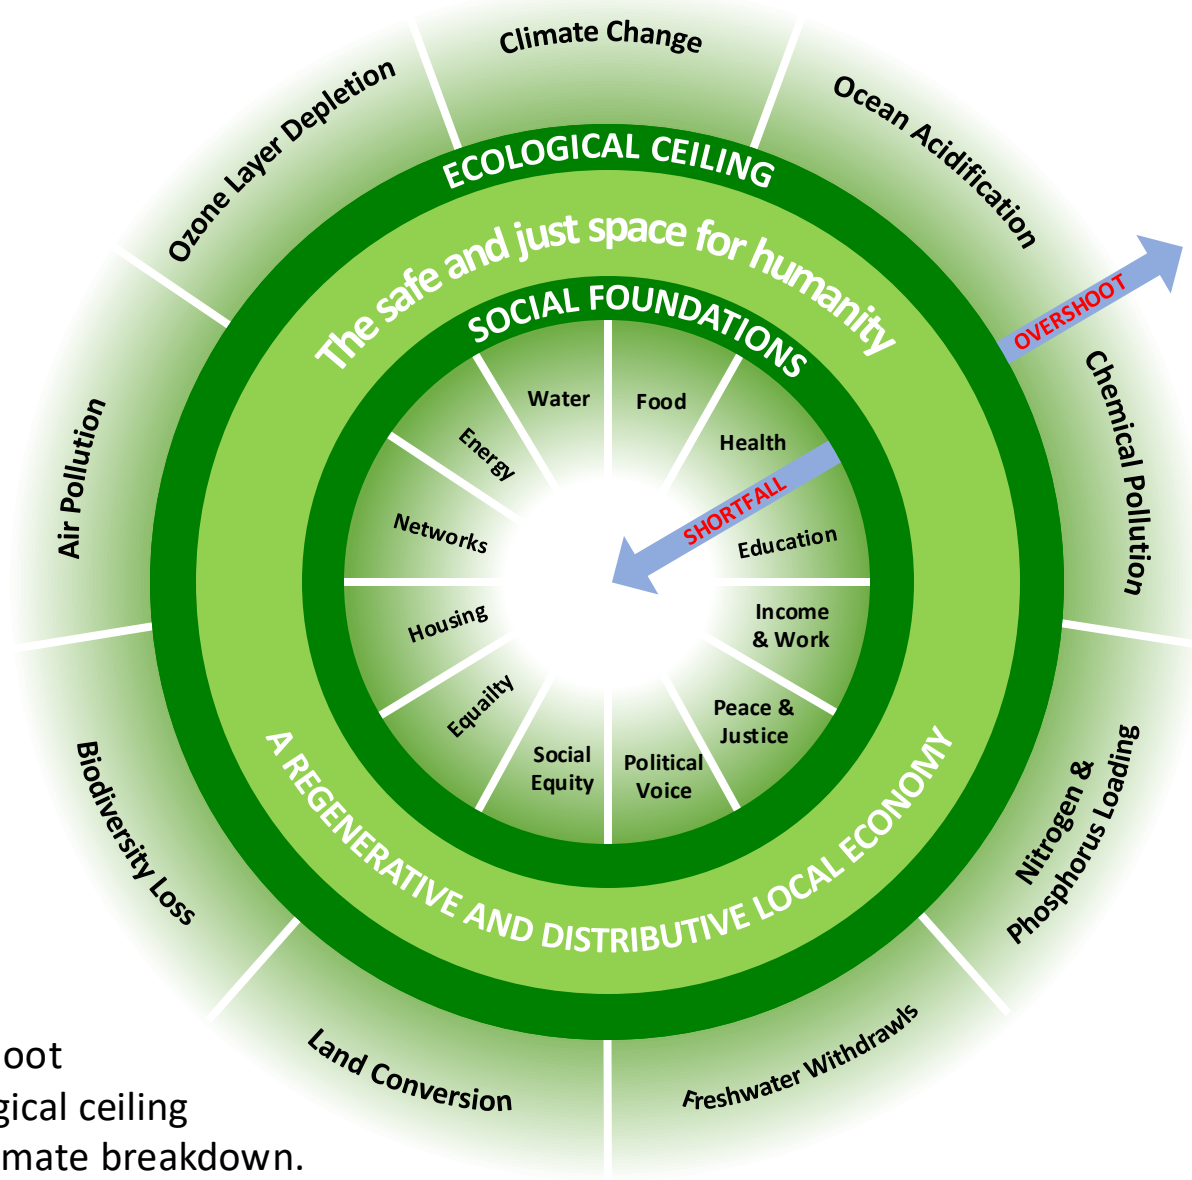

# What is Doughnut Economics?

We need to strive to get people of the hole and over the social foundation into the safe space

We need to be within the green band for a 'safe and just' future for humanity.

We also cannot overshoot that outer circle ecological ceiling otherwise we cause climate breakdown.

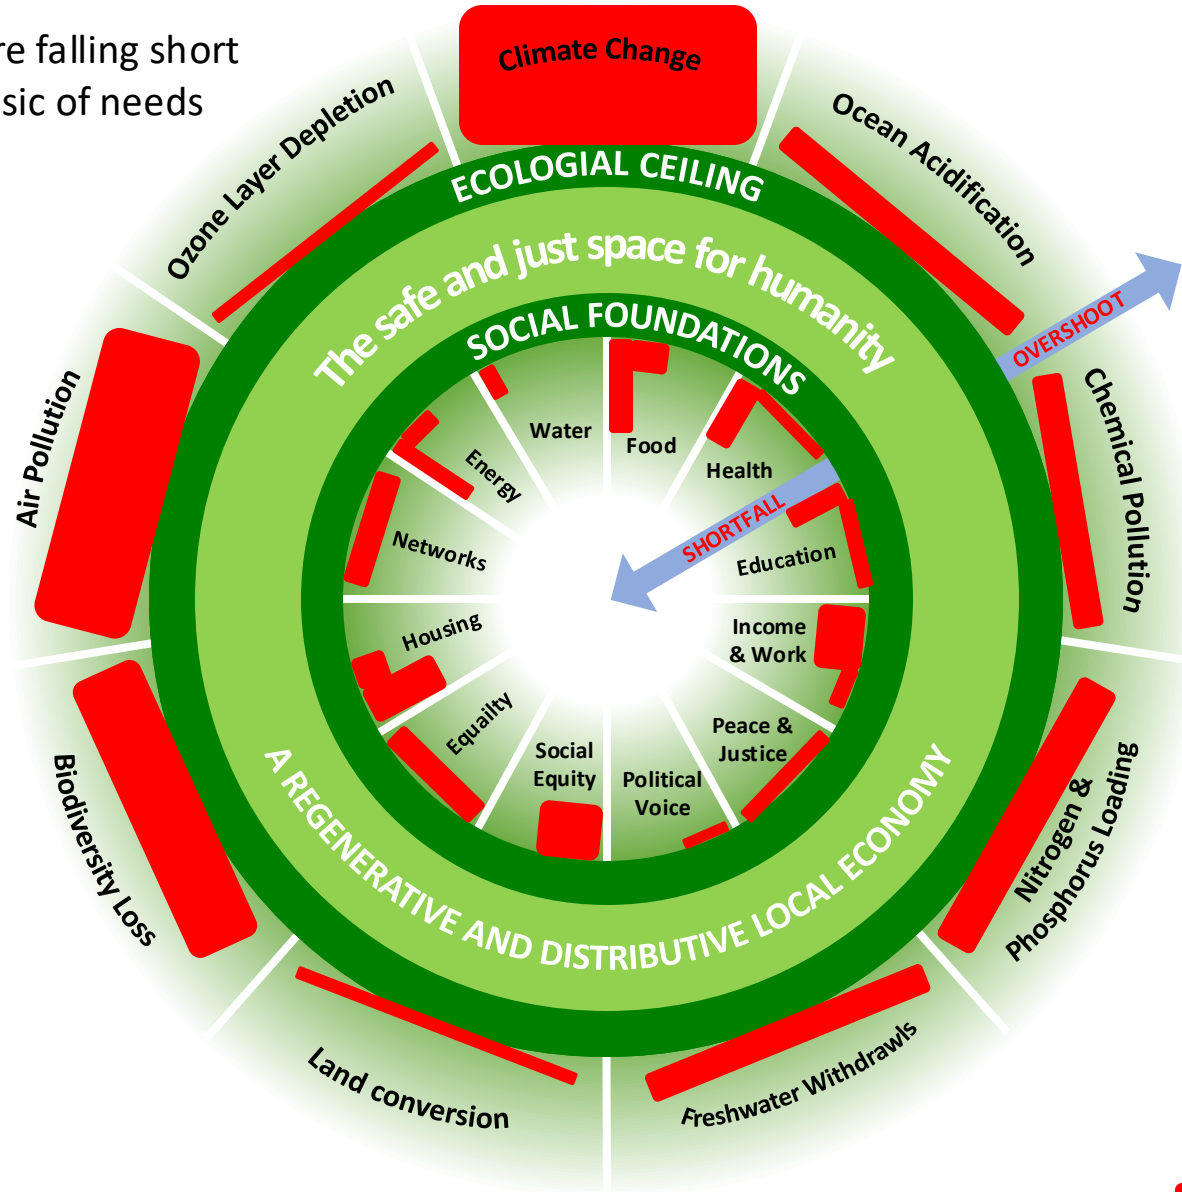

# The Doughnut for Surrey

People locally are falling short of their most basic of needs falling short.

We are failing the planet.

Our way of life is not Sustainable.

We need to change to a more **circular economy** where 'natural resources' are valued as our most important assets.

 = Undershoot or Overshoot.

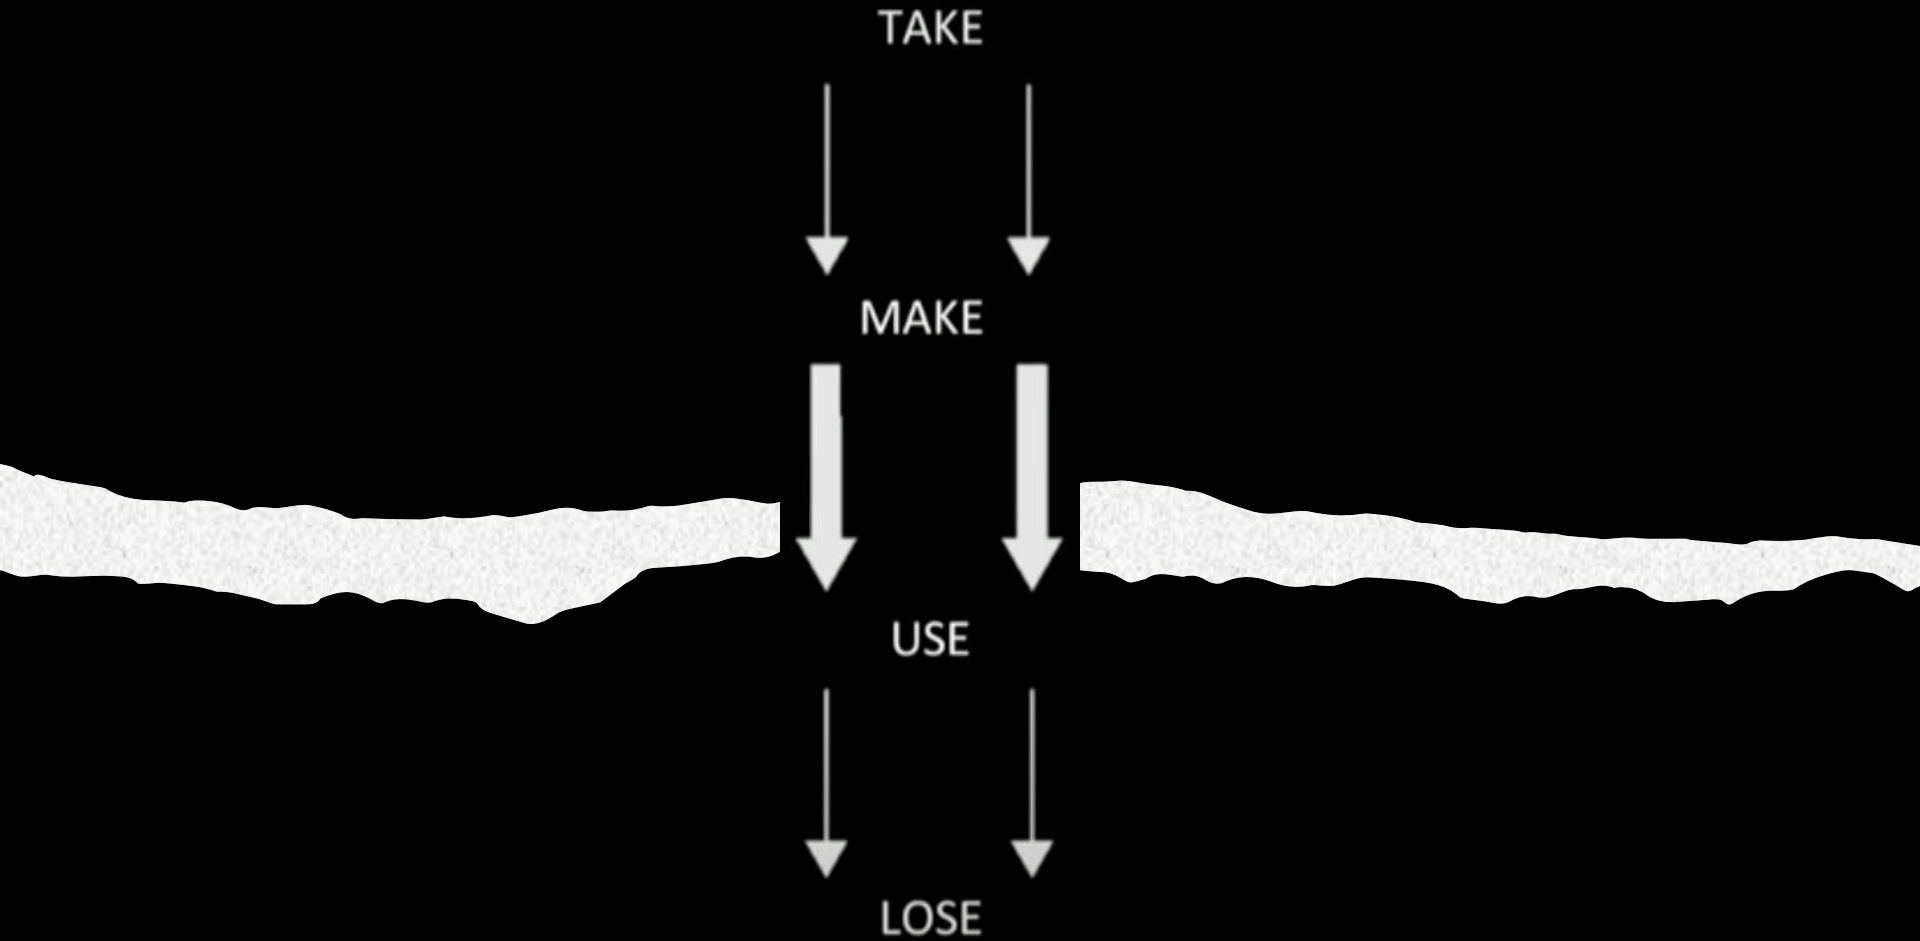

*No economist from the last century saw this picture so why would we imagine that their theories would be up for taking on these challenges.*

*We need ideas of our own.*

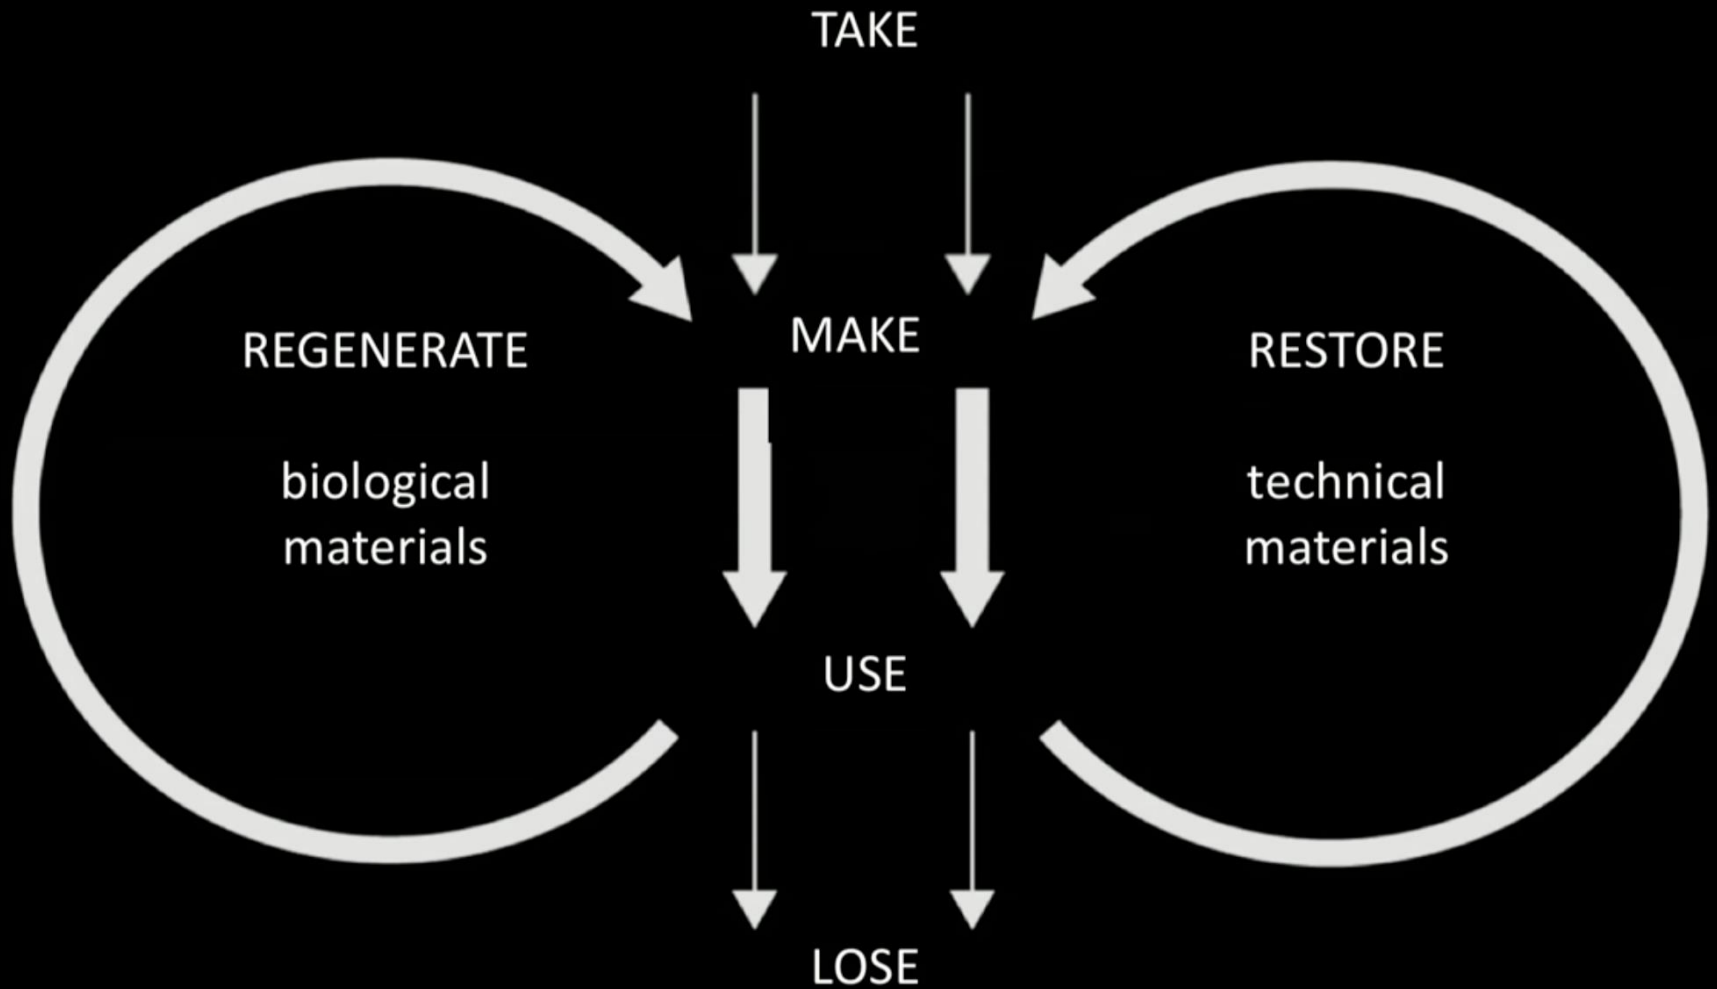

*We need regenerative and restorative economies*

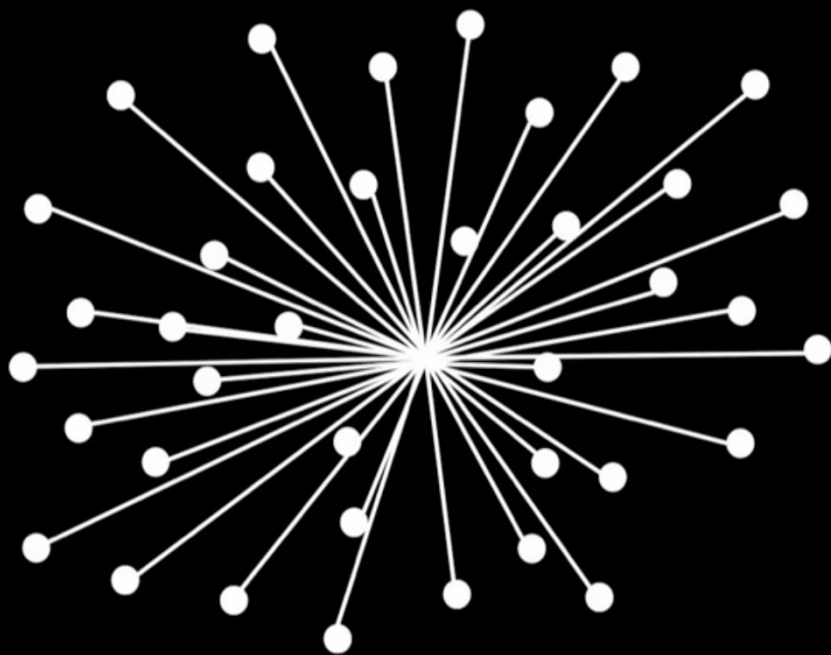

*We need to get away from degenerative industry*

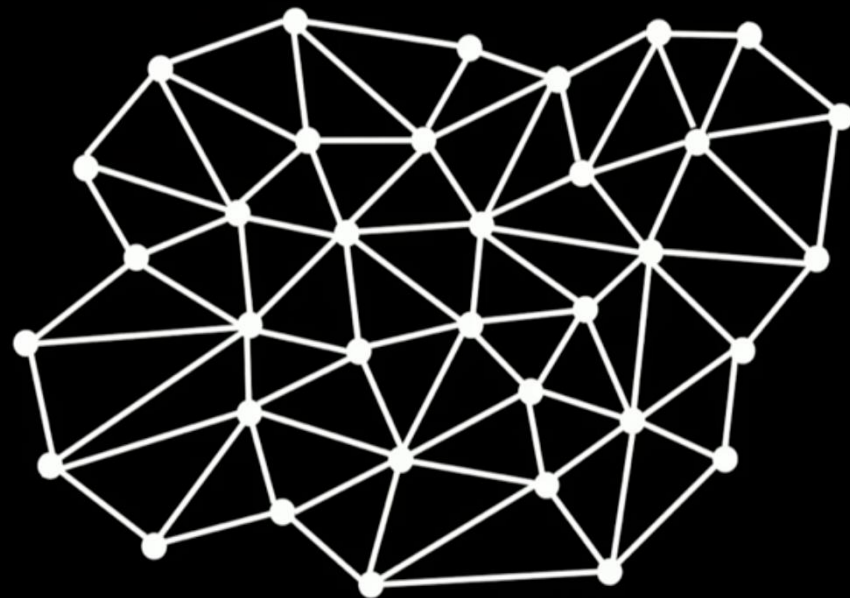

*And move towards regenerating and restoring*

*Our economies must also be distributive by design. Away from wealth, knowledge and power being in just a few hands.*

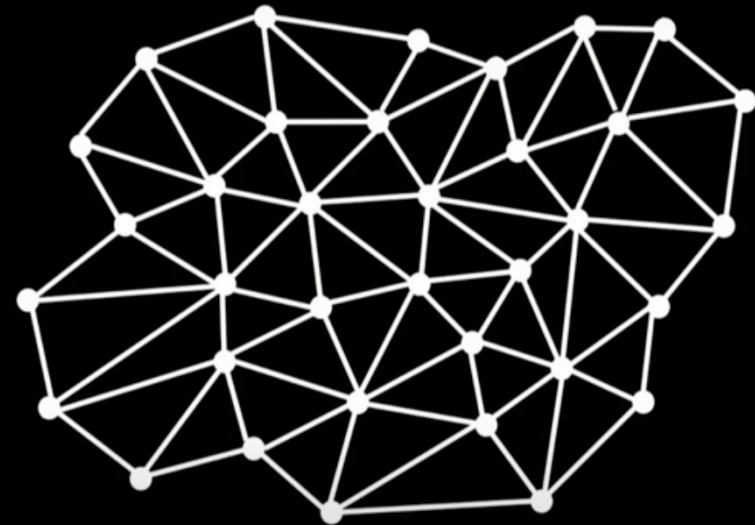

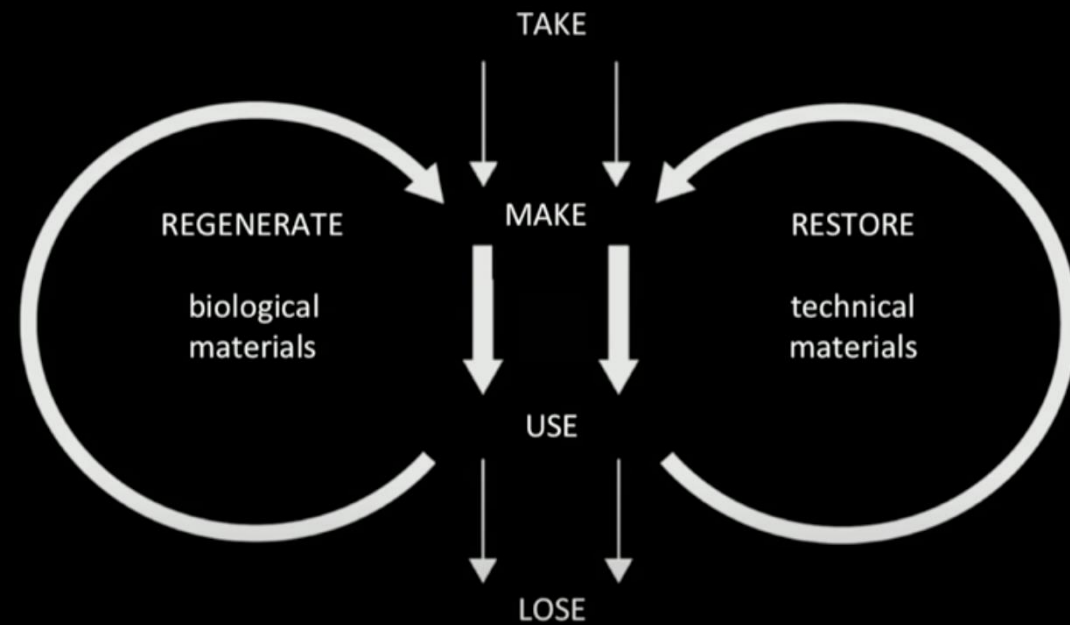

CENTRALIZED

DISTRIBUTED

*These models de-centralise power*

*Together we can all unleash the power of the doughnut*

**You never change things by fighting the existing reality. To change something build a new model and make the existing model obsolete.**

Buckminster Fuller

**So go on...  
BEE a Doughnut!**
